5.Ø CHASSIS

5.1 CHASSIS HOOD REMOVAL (EXCEPT KAYPRO ROBIE)

1. Turn off the machine.
2. Disconnect AC power by unplugging the power cord from wall outlet.
3. Remove the ten screws from the chassis hood; there are two on top and four on each side.
4. Remove the hood from the chassis.

CHASSIS HOOD REPLACEMENT

1. Lower the hood onto the unit.
2. Align the two holes on top of the hood with those on top of the chassis.
3. Insert the two flat-head screws into the holes on the top of the chassis and start them, but do not tighten them yet.
4. Insert the eight round-head screws, four on each side, and start them.
5. Tighten each screw securely.
