8.Ø POWER SUPPLIES

8.1 INTRODUCTION

Kaypro is using three different brands of power supplies at the present time. These are Astec, Boschert, and Cal D.C. These three power supplies are interchangeable with any of the Kaypro computers, if the power supply being changed is a new one from the factory.

***** EXCEPTION *****

If a power supply is removed from a 2/83 or a 4/83, and it's going to be used in another computer, it MUST be used in a 2/83 or 4/83. The power supplies used in 2/83 and 4/83 computers are not interchangeable with other Kaypro computers.

****

There are no authorized dealer repairs that can be made on any of the power supplies. The ONLY authorized dealer service to power supplies is 22ØV configuration. Each brand of power supply can be configured for 22ØV operation.
