16.2 KEYBOARD CODES AND FUNCTIONS

Control key functions in CP/M:

DEL	Delete and echo the last character typed at the console (same as rubout).
CTRL-C	CP/M system reboot (warm start).
CTRL-E	Physical, not logical, end of line. Carriage is returned, but line is not sent until RETURN key is pressed.
CTRL-G	Bell; sounds an audible bell (from keyboard).
CTRL-H	Backspace; move cursor left one character position.
CTRL-I	Horizontal tab, moves cursor to the next defined tab stop. (CP/M assumes tab stops at every 8th position.
CTRL-J	Linefeed: move cursor down one line.
CTRL-M	Carriage return; return cursor to left margin.
CTRL-R	Retype current command line. Types a "clean line" following character deletion with rubouts.
CTRL-U	Delete the entire line typed at the console.
CTRL-X	Same as CTRL-U.
